LABORATORY REPORT

Patient : Mr. VINEET

Age/Gender : 17 Year/Male

Ref. By : Dr.Aarogya Skin Care

Report printed Date : 03-Sep-2021

Reg. ID : 114

Sample : Blood

UHID. : 2109002797

Sample Reg Date : 02-Sep-2021

Collection Centre : T H C DIAGNOSTIC CENTRE

Investigations	Result	Range	Unit	Reference Range
IMMUNOLOGY				
SERUM IgE	201		IU/mL	

NORMAL RANGE:

0-46 (0-3 YRS.)

0-280 (3-16 YRS.)

0-200 (ADULT)

COMMENT: Because IgE is a mediator of the allergic response, quantitative measurement of serum IgE, when integrated with other clinical indicators, can provide useful information for the differential clinical diagnosis of atopic and not-atopic disease. Patients with atopic disease, including allergic asthma, allergic rhinitis, and atopic dermatitis commonly have moderately elevated serum IgE levels. However, a serum IgE level which is within the range of normally expected values does not rule out a limited set of IgE-dependent allergies. Total serum IgE levels may also be elevated in the presence of some clinical conditions that are not related to allergy. These clinical conditions, immunodeficiency states, autoimmune disease, Hodgkin disease, bronchopulmonary aspergillosis, IgE myeloma, and Sezary syndrome.
